

PRODUCT LIST

We excel in formulating pharmaceutical products; following USP, BP or European Pharm standards. That's how we began. The list below shows standard packaging available based on our survey in South Central African countries. Should your market require different strength, or package size; or even case quantities, our manufacturing process is flexible to customize fit your market requirements. That includes different language labels.

INJECTABLE PRODUCTS				
S.R. No.	Product No.	Product Name	Size	TYPE
1	450	<u>Adrenaline 1mg/ml</u>	1ml	Ampoules
2	446	<u>Analgin 500mg/ml</u>	2ml	Ampoules
